

Alvin Lindsay is a partner at Hogan Lovells where he focuses on resolving large-scale construction disputes in litigation and international arbitration. He has tried construction disputes to final decision in: London; New York; Mexico City; Caracas; Alberta, Canada; Panama City, Panama; Trinidad and Tobago; and Miami, Florida – among others.

Al is also well known for his expertise at the intersection of Law and Technology. He is the Chair of the Association of Certified E-Discovery Specialists advisory board, and was one of the first lawyers in the country to be a certified specialist in e-discovery. He authored "*Technology In Litigation*" which has now been continuously published by the National Institute of Trial Advocacy for 15 years. Finally, Al co-authored the landmark article -- published in the *Yale Journal of Law and Technology* – titled "*Lola v. Skadden and the Automation of the Legal Profession*," which Law.com called "one of the most thoughtful and well-researched [articles] on the topic of what automation will look like in the legal sector."
