

Meera Wagman

Meera Wagman has 25 years of experience in the construction industry specializing in providing independent expert services to owners, contractors, designers, and developers on complex construction disputes. She focuses on dispute resolution, delay and disruption analyses, productivity, scheduling, claims, project controls, construction, and project management. Meera has provided services across a wide range of industries, including heavy civil, oil & gas, infrastructure/transportation, power/energy, petrochemical, medical facilities, and vertical construction. She has consulted on many complex construction projects worldwide, including high-profile disputes such as the Panama Canal and the Burj Khalifa.

Meera has been appointed as an independent expert on delay and disruption in construction disputes in arbitration, litigation, adjudication, and mediation. She is recognized as a Global Elite Thought Leader by Who's Who Legal and is an author and frequent speaker on various construction-related topics. Meera has also appeared on the History Channel's "The Engineering That Built the World" and "Greatest of All Time with Peyton Manning" TV series' providing insights on historic engineering projects.

Before consulting, Meera worked as a project engineer for a large construction management firm working on various large commercial projects in the Northeast United States.
