

Diana Didia

Senior Vice President and CIO, AAA-ICDR; New York, NY

Currently serving as Chief Information and Innovation Officer and Senior Vice President at the American Arbitration Association, Diana was the AAA's first CIO, driving an extensive transformation of all facets of technology infrastructure, business systems and cyber security at the world's largest provider of alternative dispute resolution services. She has authority to implement innovative, cutting edge business solutions and web applications. In addition to her CIO role at the AAA-ICDR, Diana has been responsible for direct management and transformation of several non-IT functions during her tenure including Innovation, Corporate Services, and Human Resources.

Diana is a University of Michigan engineer with over 25 years of technology experience across many diverse industries and is GIAC certified in Information Security Leadership.
